DANIEL COVARRUBIAS SANCHEZ

Senior Software Engineer (Backend / Fullstack)

Mexico City, Mexico — Open to relocation to Germany / EU | dacovasan00@gmail.com - linkedin - github.com - WebSite

SKILLS

Languages | JavaScript, TypeScript, Python, Rust, SQL (PostgreSQL, MySQL)

Backend | Node.js, NestJS, Express, Flask, REST APIs, GraphQL, Microservices, Event-driven architectures, Caching strategies

Frontend | React, Next.js

Cloud & DevOps | AWS (Lambda, EC2, S3, RDS), Docker, Kubernetes, CI/CD pipelines, GitHub Actions

Architecture & Leadership | System Design, High-availability systems, Scalability, Code Reviews, Mentorship, Technical Decision Making

WORK EXPERIENCE

Xira Intelligence, Mexico City

- Senior Software Engineer / Technical Lead

January 2023 - July 2025

- Led the **architecture, design, and hands-on development** of the company's flagship platform, focusing on **scalability**, **performance**, and **high availability** under high-volume workloads.
- Designed and implemented **microservices** and **event-driven architectures**, including **Redis caching layers** and **automated CI/CD pipelines**, improving **deployment speed** and **infrastructure efficiency**.
- Provided **technical leadership** through **code reviews**, **architecture decisions**, and **mentorship**, ensuring **clean, maintainable, and scalable codebases**.
- Designed and automated critical internal workflows, **reducing development time by 50%** and enabling new features to be deployed **in under one week**.
- Oversaw system stability and performance, achieving **98% system availability**, **reducing latency by 40%**, and **increasing enterprise customer satisfaction by 25%**.

Xira Intelligence, Mexico City - *Junior Full Stack Developer*

December 2021 - December 2022

- Designed and implemented an **AI-powered voicebot architecture** for a major **telecommunications enterprise**, improving **user experience** and **operational efficiency**.
- Built **custom chatbots** using internal **NLP** and **API integrations**, automating **support workflows** and **data management**.
- Developed **RPA (Robotic Process Automation)** solutions to automate **multi-platform workflows**, reducing **manual intervention** and **operational errors**.
- Consistently exceeded **quarterly KPIs** and was the only team member to achieve **100% of annual deliverables** through high-quality execution and strong ownership.

EDUCATION

National Polytechnic Institute (IPN)

Computer Systems Engineering (Equivalent to B.Sc. in Computer Science)
July 2022
Mexico City, Mexico
GPA: 8.9/10

KEY ACHIEVEMENTS

Process Optimization Reduced **development times** by **50%** through **automation** and improvements in **CI/CD** .

System Scalability Designed a scalable architecture for **Voicebots** used by one of the leading **telecommunications** companies in Mexico.

Efficiency and Productivity Implemented **RPA** to automate complex workflows, reducing **human errors** and improving **operational efficiency** by **30%.**
